This year's seminar will focus on the value in performing adequate pre-shift inspections as well as taking a closer look at the legal side of an MSHA inspection and the judicial process that can often follow an inspection. Attendees will be introduced to information and the tools necessary to protect their personnel, avoid penalty assessments and ensure the continued operation of their businesses. **This is a must attend event for contractors working on mine sites.**

Additionally, there will be an afternoon round table discussion hosted by MSHA, DMM and keynote speaker David Hardy designed to discuss and answer questions related to regulatory and inspection matters. Mike Davis, Southeastern District Manager, will be attending the seminar and leading the panel discussion as well as giving an update on MSHA trends. This is a GREAT opportunity to engage the head MSHA personnel on your terms!

**Portions of the Safety Seminar program can count toward
MSHA Annual Refresher Part 46 training!**
